**Re: Watercourse Survey works on behalf of Devon County Council**

Dear resident

I write to confirm that Orbital Surveys have been commissioned by Devon County Council to undertake a topographical survey of the watercourses and structures in Kenton as part of a flood study. The survey is non-intrusive and entails inspecting, photographing and measuring the watercourse and associated structures.

The surveyor has informed us that they will likely be on site on the week commencing the 30<sup>th</sup> of September, with the survey in your area being toward the end of the week, on the Friday or Saturday.

If you could ensure access is granted to the surveyor to undertake the works that would be very much appreciated as the more thorough and detailed the survey, the better and more accurate the hydraulic modelling exercise will be produced as a result.

If you have any queries or concerns, please contact me using the details above.

Yours faithfully,

John Galt

Devon County Council Flood Risk Engineer
